

Deflection (Clipper) Type Weight Indicator

Wagner Instrumentations Deflection (Clipper) Type Weight Indicator is ideal for use with small drilling and work over rigs. The unit comes complete with 12" indicator with complete dial set, heavy-duty steel box for mounting, 25-foot hose, and Deflection type sensor with c-clamp. Unit is ready to use out of the box and can be moved from rig-to-rig with ease.

Benefits

- Unit is portable, rugged, dependable and is ready to be placed on the drill line right out of the box
- Adjustable dampers allow operator controlled pointer sensitivity

Features

- Available with English or Metric dial sets
- Deflection type load cell may be used on wireline sizes from 7/8" to 1 1/4"
- Easy to read 12" indicator
- Optional box available to house (2) 6" gauges, and (3) 5" meters
- 48,000-pound maximum single line load capability with 1" line
- Provided with a standard with 25-foot hose length (other lengths available upon request)
- Heavy duty, compact, steel box included with system
- Provides superior accuracy through the use of (2) pointers, a primary pointer for hook load, and a secondary (vernier) pointer for indicating small weight changes

To order specify:

- Single line load capacity needed
- Size and number of lines
- Scale needed (Pounds, Kilograms or Decanewtons)
